

The Smart Launch Program

Save time, maximize resources, and see a faster return on your investment with ion's Smart Launch program. Our Professional Services team will help you transition to LiveBall and get your landing page program off to a smooth start.

The Smart Launch program follows a proven methodology that takes into consideration your unique needs and business requirements. A typical Smart Launch includes form, export, and third-party integration setup, plus initial execution of several landing page experiences.

Smart Launch is designed to get you up and running as efficiently as possible, taking into consideration your specific business goals and objectives for your landing page program.

What's included in the Smart Launch implementation?

In each phase of the Smart Launch program, we will accomplish specific tasks to ensure a successful implementation. The Smart Launch program includes:

- ✓ Dedicated account and support manager for hands-on guidance throughout your onboarding process
- Form and data export setup
- ✓ Third party integration implementation
- ✓ Customized one-on-one copilot training sessions
- ✓ The production of your first landing experiences from publishing to QA to launch

To supplement the knowledge transfer you receive during the Smart Launch program, you will always have access to ion's training webinars and support services.

Get your landing page program up and running seamlessly with ion's Smart Launch program!
